SIDE VIEW

Continuing the structural expression of the MŪ811 and MŪ1111 tables, the console table explores a diminutive version of the former two. In constructing the legs and top from a single material, and manipulating the surface treatment of various edge-planes, the connection between top and supporting structure is continuous, creating a slender and sculptural object.

PRODUCTION PROCESS  
The parts of the MŪ111 console table are laser-cut from mild steel. The legs and supporting structure are assembled through careful precision welding. The completed product is checked for stability, then blackened and hand-finished with a wax sealant. Following the last quality check, the legs are removed and the table is packed in a single crate.

## PREASSEMBLED

The MÜ111 table can be flat-packed. The legs are easily fixed to the base with a clip-in-and-lock mechanism that is integrated into the sub-structure of the table top.

Our shipping fee for Western Cape deliveries includes on-site assembly. For other locations, our team will make the suitable arrangements in order to provide the same service on the day of delivery.

## CARE AND MAINTENANCE

Find recommendations for cleaning and care at: [www.muvekstudio.com/care-guide](http://www.muvekstudio.com/care-guide).

As the waxed mild steel surface of this product could be considered a raw and living material, we urge all customers to pay close attention to our recommendations on the cleaning and maintenance of a mild steel item.

Because of the unrounded edges of the legs, we recommend against placing this product in children's rooms or other domestic areas to which young children have constant and open access to.

## WARRANTY & REPAIR
