FRONT VIEW (3D)

The MŪ811 long table was the first project which provided the direction and sensibility of MŪVEK's first collection. It is characterised by the positioning of its legs at the table's outer corners, eschewing the norm of the table-surface overhang. This assembly draws attention to the considered and exposed intersection of the leg, apron and surface and ensures an extremely rigid construction.

PRODUCTION PROCESS

The parts of the steel base and legs of the table are laser-cut from mild steel sheets, which are then precision welded in a way that allows the four legs to be removed for shipping. The assembled structure is powder coated. The timber or stone top is manufactured separately in a way that allows the surface to locate within the steel frame, leaving only a thin visible edge. Following the final quality check, the completed product's legs are removed and placed in a large crate alongside the top.

MATERIALS

Mild steel, powder coated

Oak overedge veneer (type of stain depends on the order)

Dekton Sirius, black (alternative to the overedge veneer table tops)

PREASSEMBLED

The MÜ811 can be flat-packed in a single crate. The legs can be fixed to the structure on site with the use of robust machine screws.

Our shipping fee for Western Cape deliveries includes on-site assembly. For other locations, our team will make the suitable arrangements in order to provide the same service on the day of delivery.

CARE AND MAINTENANCE

Find recommendations for cleaning and care at: www.muvekstudio.com/care-guide.

Because of the unrounded edges of the legs, we recommend against placing this product in children's rooms or other domestic areas to which young children have constant and open access to.

WARRANTY & REPAIR

MÜVEK provides a one-year warranty on all products against structural defects, defects in materials and workmanship.
